

Actual KYC Process VS AI KYC

Actual KYC process

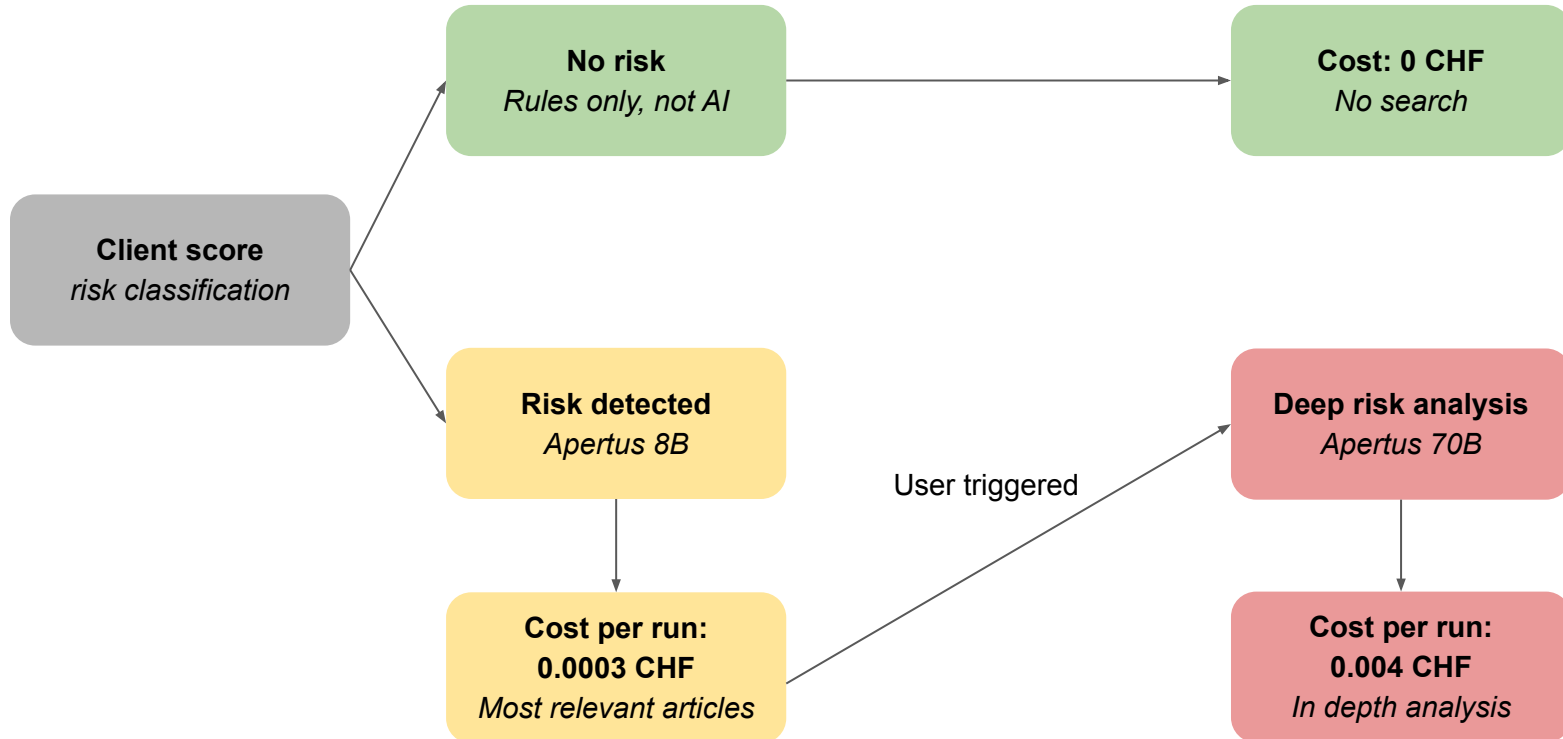

AI KYC powered

- Detection happens as changes occur, rather than waiting for the next periodic review cycle
- Compliance officers work more efficiently as AI handles the manual search, cutting review time from several hours to a few minutes at a fraction of the cost
- Workload is spread evenly over time instead of piling up in end-of-cycle review waves, which reduces the need for temporary staffing spikes
- Operational and regulatory risk is lower, because fewer material changes go unnoticed between reviews, reducing exposure to compliance breaches and fines.

Cost and model structure

Yearly cost example

Monitored clients

1,000

Max cost per client run

0.0043 CHF

Daily run

2

1,000 Clients x 0.0043 CHF x 2 queries/day x 365 days

Total estimated annual cost

3,139 CHF

Realistic annual cost

Tiers	clients	Total query cost	Annual
No risk	600	CHF 0	CHF 0.00
First level risk	300	CHF 0.0003	CHF 65.70
Second level risk	100	CHF 0.0043	CHF 313.90

Realistic cost per year

CHF 379.60

vs. worst-case (CHF 3,139)
